

amendment to the specification to provide the requisite antecedent basis within this application for the enumerated physical traits set forth in claim 6. As pointed out to the Examiner, same for the "fingerprint" physical trait, all of the other enumerated physical traits were disclosed in the identified parent Serial No. 08/410,318, filed March 24, 1995.

Appended hereto is a photo-copy of Figure 6 of the aforesaid application Serial No. 08/410,318.

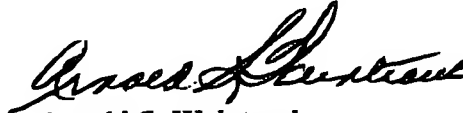

Thus, there is appropriate antecedent basis for inclusion of the Amendment into the specification.

With respect to the term "fingerprint" this was part of the originally filed claims of this continuing application and, specifically, was originally filed claim 5.

The Examiner indicated that once this Amendment was effected he would discuss the application with his supervisory Examiner.

Accordingly, entry in consideration of this Amendment is respectfully requested.

Respectfully submitted,

  
Arnold S. Weintraub  
Reg. No. 25523

Dated: April 8, 1998
